IRANPHARMA

Post Show Report

IranPharma is not "Just an Exhibition"

The International Exhibition on Pharmaceuticals and Related Industries, IranPharma, is the largest pharmaceutical event in Iran and one of the major events of its kind in the MENA Region. It is held by the Iranian Pharmaceutical Industries Syndicate (the largest private sector entity in the Iranian health sector), and is supported in part by the Ministry of Health and Medical Education, the Iranian Food and Drug Administration IFDA, as well as a host of other health-related associations, syndicates and bodies.

Throughout its decade-long existence, this event has consistently aimed to expand contributions and innovative collaborations within the pharmaceutical ecosystem, through empowering tech transfer, creating platforms for effective networking, establishing export markets and fostering opportunities of investing in pharmaceutical technologies.

In trying to achieve the above-mentioned objective, IranPharma has made its mission to promote the engagement of all aspects of the industry in this event, as a networking hub for all sectors involved. This self-proclaimed responsibility has led to the organization of several keynote speeches and scientific and guild panels, B2B and multilateral trade meetings, syndicate conventions, interactive competitions and challenges, health-related book and media side-events, and student tours, to name a few of the highlights of events happening at the bylines of IranPharma in the past decade.

Finished Dosage	Food and Dietary Supplements	Cleanroom
API	Machinery	Distribution
Vaccines and Biotech	Equipment	Export
